

Isla Grande Container Holding Area

The image below was taken in 1995, showing both hangars with containers multiplying. The old AAB hangar was removed in 2010. The old USCG hangar remains today as part of the Isla Grande Marine Terminal operated by Crowley.

The 1980 image above shows the old hangars with S.25 Sunderland “Excalibur VIII” after sale and being prepped, by new owner, for its flight to the UK. The seaplane ramp is in the center of photo.

The image above is from 2023 showing the 87 acre terminal in full operation of receiving, deploying and storing cargo containers. See more photos of AAB/San Juan at <https://www.antillesairboats.com/san-juan> and USCG at <https://www.antillesairboats.com/u-s-coast-guard>
